Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

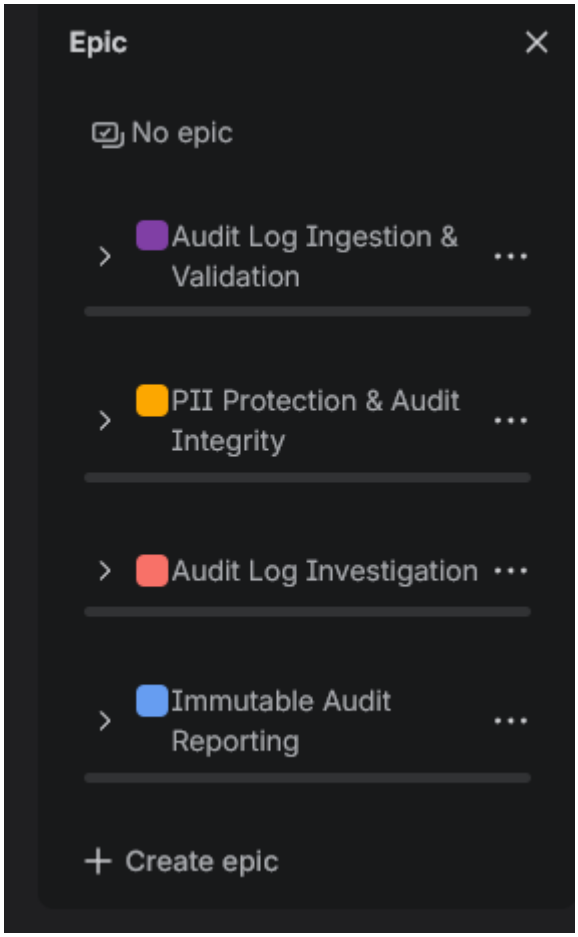

Section: G

NAME	SAGAR K
SRN	PES2UG24CS424

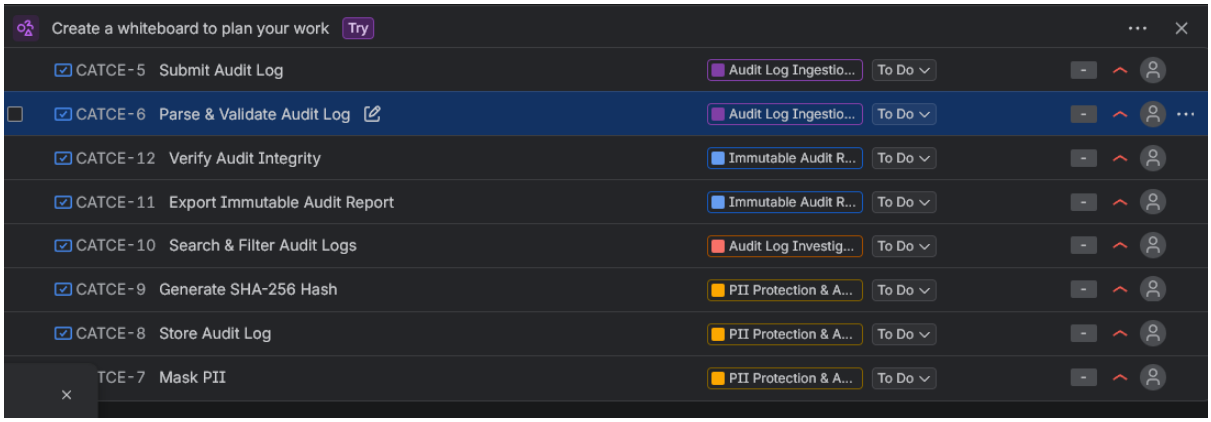

Centralized Trail Audit Compliance Engine:

1.Epics:

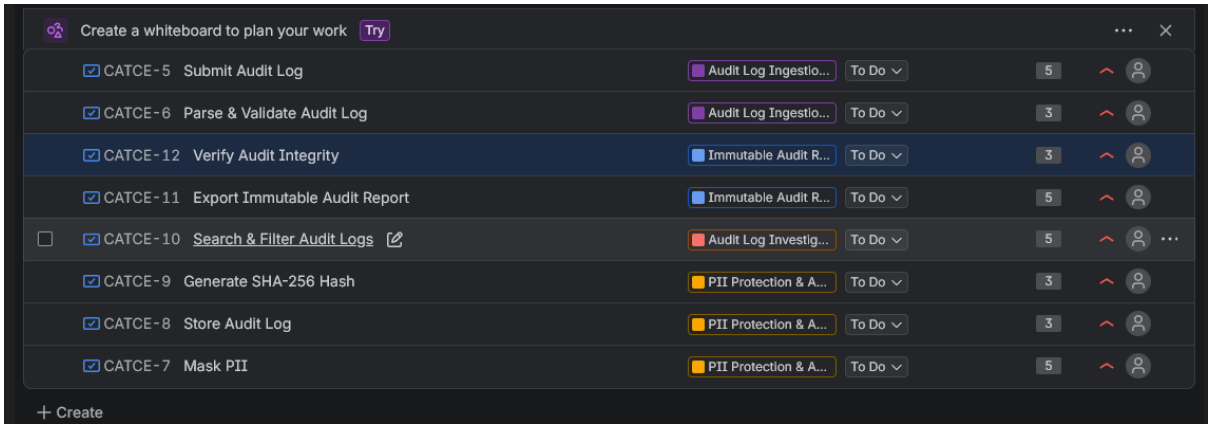

There are 4 epics in this project.

2.Epics with their stories (Total 8 stories are divided into 4 epics):

3. Assign Story Points with their priorities:

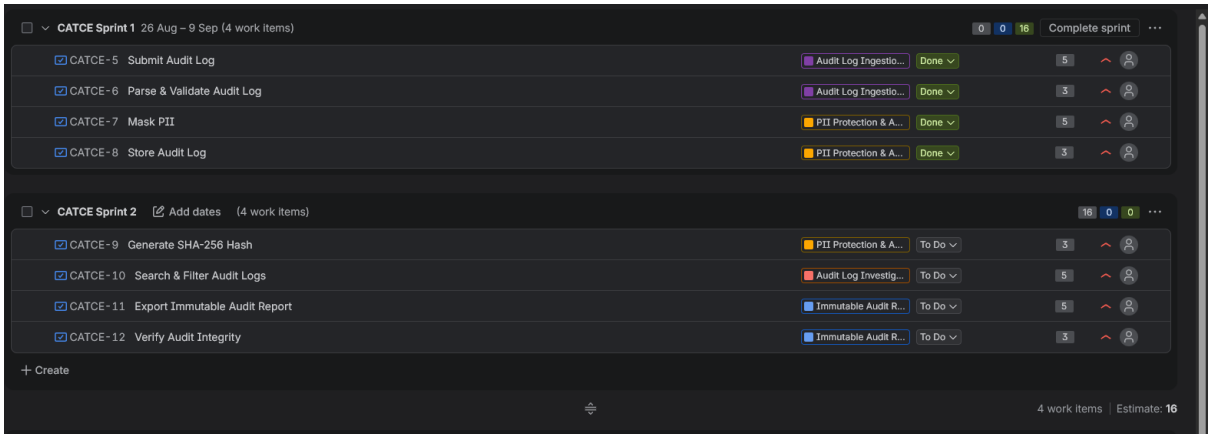

4.Creation of a sprint:

There are two sprints 1 and 2

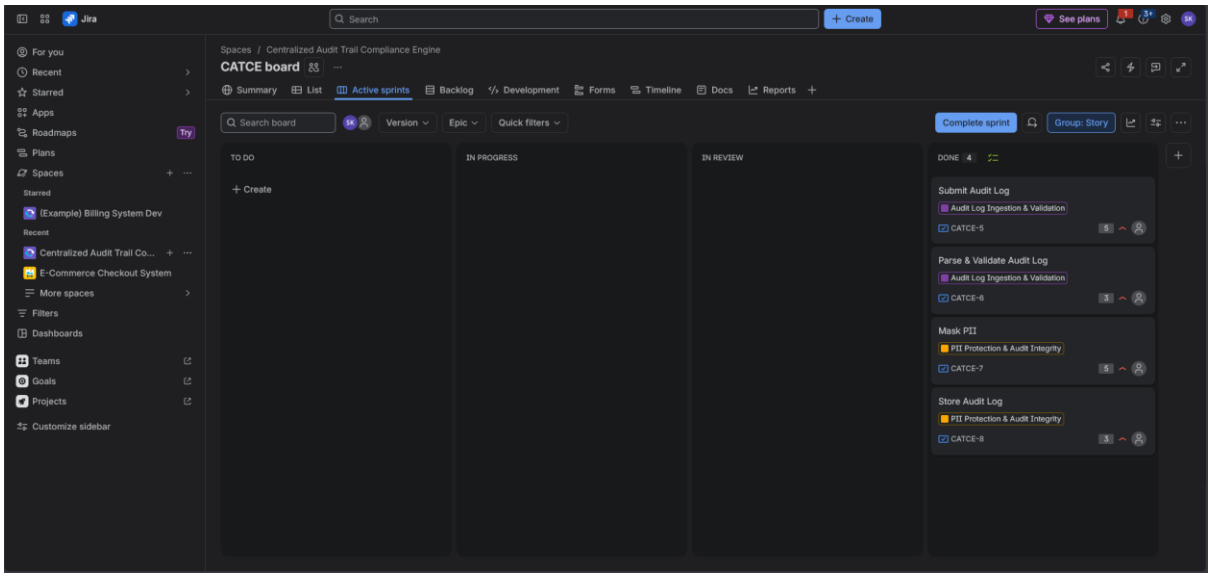

Each of them are assigned with different stories.

Each of the sprints have 4 stories and 16 story points each.

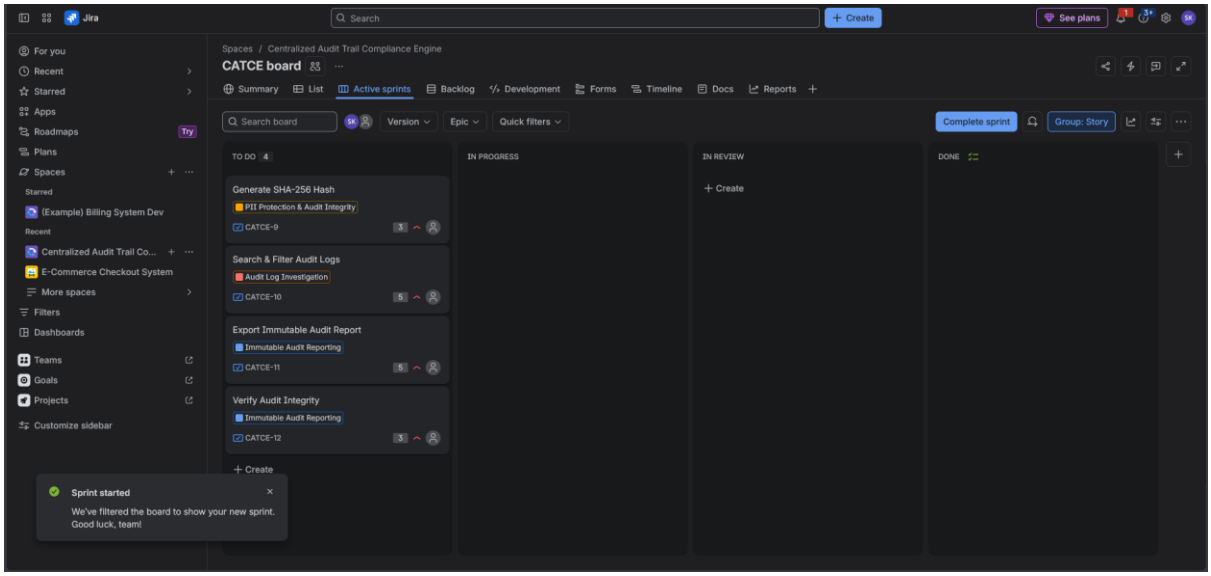

5. Stimulation of sprints:

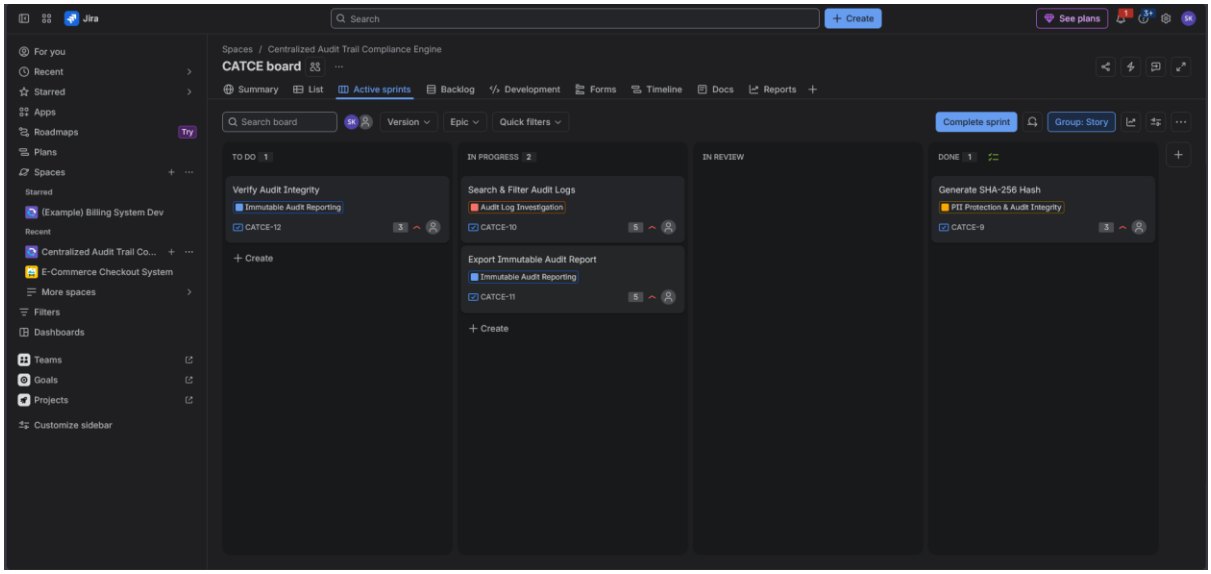

Sprint 1:

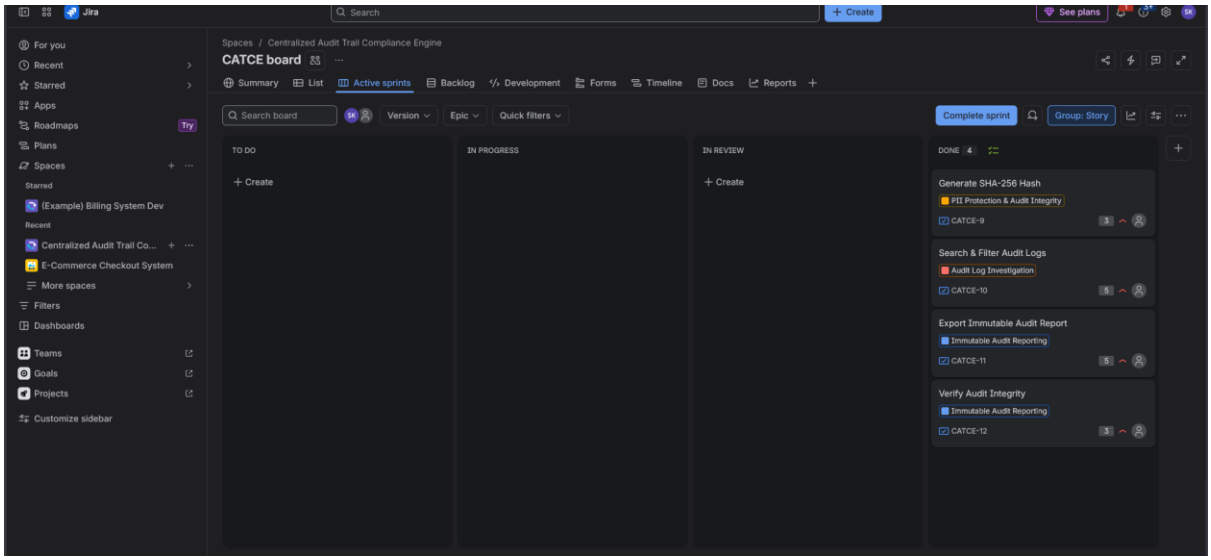

Sprint 2

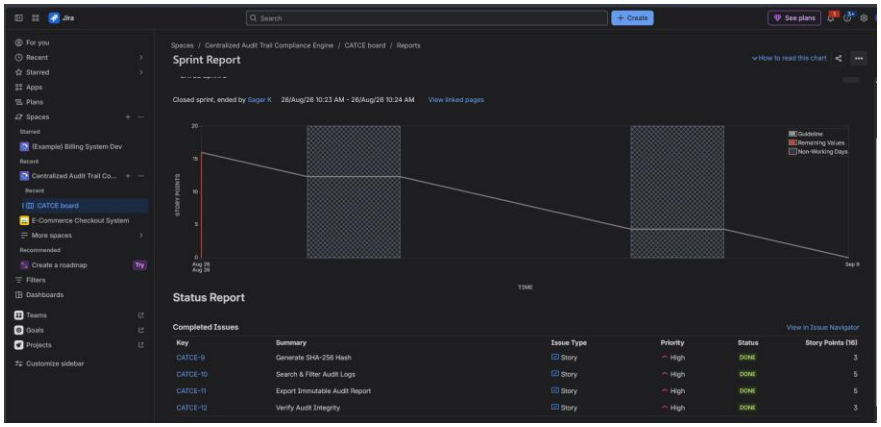

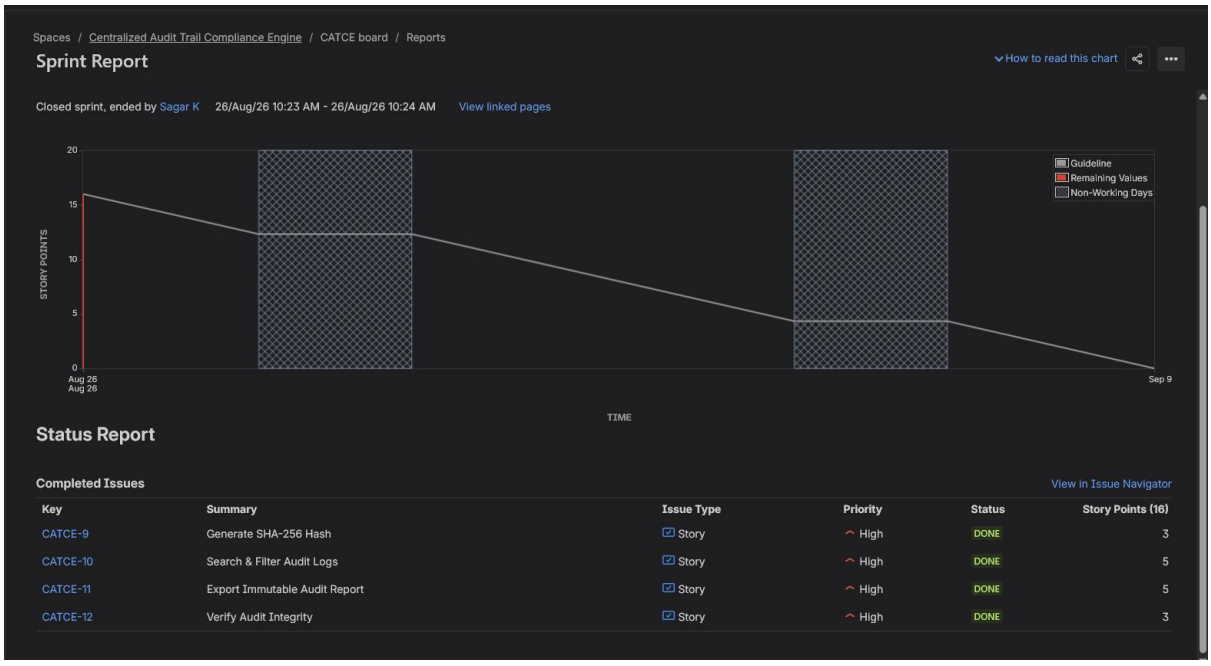

6.Active Sprint Board:

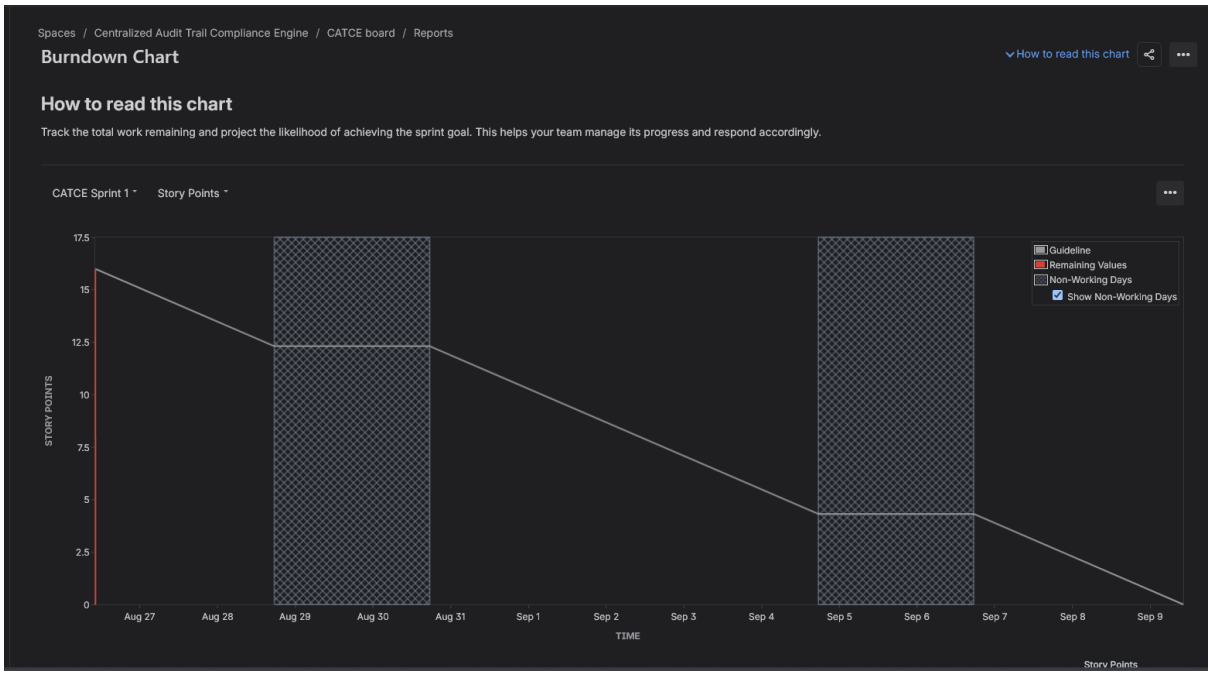

7.Sprint Reports:

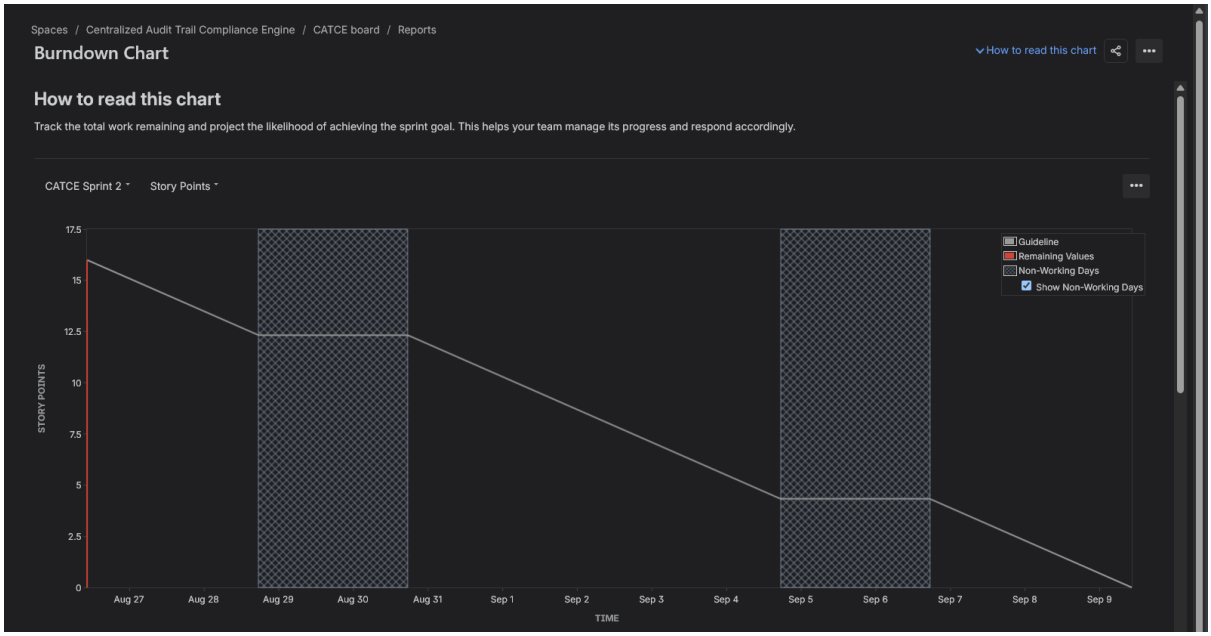

8.Burndown chart:

Sprint 1 :

				Story Points		
Date	Issue	Event Type	Event Detail	Inc.	Dec.	Remaining
26/Aug/26 10:11 AM	CATCE-5	Sprint start		5		
	CATCE-6			3		
	CATCE-7			5		
	CATCE-8			3		
	Total					16
26/Aug/26 10:14 AM	CATCE-5	Burndown	Issue completed		5	11
26/Aug/26 10:15 AM	CATCE-6	Burndown	Issue completed		3	8
26/Aug/26 10:16 AM	CATCE-7	Burndown	Issue completed		5	3
26/Aug/26 10:17 AM	CATCE-8	Burndown	Issue completed		3	0
26/Aug/26 10:22 AM	CATCE-5	Sprint ended by Sagar K				0
	CATCE-6					0
	CATCE-7					0
	CATCE-8					0
	Total					0

Sprint 2 :

Date	Issue	Event Type	Event Detail	Story Points Inc.	Dec.	Remaining
26/Aug/26 10:23 AM	CATCE-10	Sprint start		5		
	CATCE-11			5		
	CATCE-12			3		
	CATCE-9			3		
	Total					16
	CATCE-9	Burndown	Issue completed		3	13
26/Aug/26 10:24 AM	CATCE-10	Burndown	Issue completed		5	8
	CATCE-11	Burndown	Issue completed		5	3
	CATCE-12	Burndown	Issue completed		3	0
	CATCE-10	Sprint ended by Sagar K				0
	CATCE-11					0
	CATCE-12					0
	CATCE-9					0
	Total					0

9.Reflection Questions:

1. Did your estimations reflect the actual effort?

Yes. The estimated story points were reasonably accurate because all planned stories were completed within the sprint. The 16 story points were successfully delivered, showing that the estimations were close to the actual effort required.

2. Was your backlog well-prioritized?

Yes. The backlog was prioritized by implementing the important functional requirements first and distributing the stories across the planned sprints. This helped the team focus on completing the most important work.

3. How did your simulated sprint align with your plan?

The simulated sprint aligned well with the plan. The stories were assigned to the planned sprints, worked on through the workflow, and eventually moved to Done. The planned sprint work was completed successfully.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed that the team was able to complete the planned workload within the sprint. Since the remaining work reached 0 story points, it indicates that the team had sufficient capacity to handle the planned 16 story points. It also helped visualize the progress and confirm that the sprint goal was achieved.
